

INSTA-FLUOR MICROBIAL DNA DETECTION SLIDES

Tech ID: 17716 / UC Case 2006-148-0

ABSTRACT

Dry and stable microscope test slides for detection of specific target DNA using fluorescence microscopy. This invention can be used with any aqueous biological sample.

? Stable and useable for at least 1 month

? Results instantly available for use in microbial testing

? Easily stored at room temperature

? Ideal for field use

? Easily applicable to the biological terrorism and Weapons of Mass Destruction market as well as for general environmental research
